RESPONSE

Evolving the security of your environment with active response

Considering Security for Cloud

Businesses continue to take the digital journey, moving their workloads to the cloud at a rapid pace. Many organizations are using their cloud as a conduit for growth as it increases flexibility and productivity, along with reduced operating costs.

However, with the rate of cloud adoption and remote work increasing, the need for robust security tailor-made for cloud technology does so too. Cloud environments are not immune to cyber threats and organizations' top challenges include data loss, privacy and compliance issues, and compromised credentials and resources.

INDUSTRY STATISTICS

From 2021 to 2022, **98% of companies** have experienced at least one cloud data breach
(IDC & Ermetic)

Top cloud security concerns include **data loss and leaks** (69%), **privacy** (66%), and **exposed credentials** (44%)
(Statista)

Cloud account compromises cost an average of more than **$6.20 million over 12 months**
(Proofpoint & Ponemon)

True 24/7 MDR Securing Your Cloud

To support the growing shift to hybrid and cloud environments, we designed Blackpoint Cloud Response – the latest addition to our cyber ecosystem of MDR add-on solutions. Cloud Response takes the power and effectiveness of our proprietary managed detection and response technology and extends it to your cloud.

Focus on your day-to-day operations knowing that our 24/7 security operations center (SOC) leverages MDR to safeguard your cloud platform. While most solutions on the market alert you to take action, Blackpoint provides fast, active response to adversarial threats on your behalf. Currently, Cloud Response supports Microsoft's 365 service, namely, Azure Active Directory (AD), Exchange, and SharePoint.

See your cloud infrastructure actively secured

The Power of MDR for Your Cloud

Get peace of mind with Cloud Response which extends Blackpoint's MDR technology and expert SOC analysts to the cloud. Know that you are protected against even the fastest, most advanced types of cyberthreats targeting your third-party cloud platform.

Active Monitoring & Response

Cloud Response allows our 24/7 SOC to provide immediate response to adversarial threats. Rather than alerting you to take action, we take decisive actions against any malicious activity on your behalf. Trust active monitoring and unified response to protect your cloud.

Streamlined Setup & Onboarding

Simple setup? Check. Cloud Response is seamlessly integrated with our MDR technology making the onboarding process a simple one. Follow a six-step guide and have Cloud Response guarding one of the most critical IT systems your business uses in just one day.

Why Cloud Response?

- Extends Blackpoint's MDR capabilities into Microsoft's 365 cloud service.
- Enables our 24/7 security operations center (SOC) to see contextual data within your cloud environment and provide immediate and active response against anomalous behavior.
- Allows you to set up policy features to implement cyber hygiene processes across all users and monitor events through custom notifications.
- Self-serve Cloud Response web application walks you through a simple, guided six-step onboarding process. Use the web application to:
  - Manage your Microsoft Azure AD and Exchange policies,
  - Control and customize Azure AD, Exchange, and SharePoint event email notifications across a tenant, and
  - Control and customize individual user event email notifications within a specific tenant. This includes the ability to schedule future date ranges in the case of known travel to unapproved countries.

Ready to bring active response to your cloud workflows?
